PROFILE INFO

Enthusiastic Software Engineer with web development expertise, strong problem-solving skills, and a passion for creating efficient software solutions.

EDUCATION

2023-2024

ALX SOFTWARE ENGINEERING PROGRAMME

- software Engineering

2019-2024

DAVID AKINTOLA COLLEGE

- Science
- SSCE

SKILLS

- **C Programming lang**
- **Data Structure and Algorithm**
- **Python/Flask**
- **Javascript/Nodejs/Expressjs**
- **Typescript**
- **MongoDB/MySQL**
- **HTML/CSS**
- **Effective Communication**
- **Critical Thinking**
- **problem solving**
- **Teamwork**
- **adaptability**

LANGUAGES

- English (Fluent)
- Yoruba (native language)

EXPERIENCE

Database Management & Optimization:

- Experience with designing, implementing, and optimizing relational and NoSQL databases, ensuring data integrity, security, and efficient querying.

API Development:

- Proficient in building and maintaining RESTful and GraphQL APIs, focusing on scalability, performance, and security.

Server-Side Programming:

- Strong understanding of server-side programming languages like Python, Node.js, or javascript, and experience with frameworks such as , Express, and Flask.

Cloud & DevOps Integration:

- Familiar with deploying backend applications on cloud platforms (e.g., AWS, Azure) and using CI/CD pipelines to automate testing, integration, and deployment processes.

Version Control & Collaboration:

- Experience using Git for version control, and working collaboratively in teams using platforms like GitHub or GitLab for code management and review processes.

MY PROJECTS

Project: AirBnB Clone (ALX project)

Role: Back-end Developer

- Database Management
- Backend Development
- Testing and Debugging
- User Authentication and Authorization
- Version Control.
- collaboration and Communication

Blogging Website

Role: Full-stack Developer

- Developed user authentication
- Implemented database models for users and posts, ensuring efficient data handling.
- Designed and integrated a responsive frontend with dynamic content rendering
